ITEK (ITALY) – CUBO: PRIVATE VILLA

SWITZERLAND

Set over three floors, this chic villa, located in St Moritz, is a stunning mix of classic chalet and sleek contemporary design, which the home automation needed to reflect.

Judges said, "This villa has an understated elegance, extensive multi-room AV and not a pair of skis in sight!" as well as "This villa shows stunning use of seamless integrated technology."

ITEK integrated lighting, HVAC, security cameras as well as distributing an entertainment audio-video system

'Understated elegance, extensive multi-room AV and not a pair of skis in sight!'

throughout the villa. The client asked for high fidelity surround systems to be installed into the home cinema, master bedroom, children's bedroom, living room and lounge.

Each room then received HD set-top boxes and Apple TV from the centralised Creston DigitalMedia 8-zone switcher. As well as this, an 18-zone audio multi-room system powered by a Creston Sonnex Multiroom system was integrated. Each zone has a Creston MTX-3 wireless handheld remote for entertainment control and the spa has a waterproof Creston UFO remote. Into the formal living room, lounge and home cinema area a Creston TSW-1050 10in wallmount touchpanel was installed, for the complete home control experience.
